Preparation

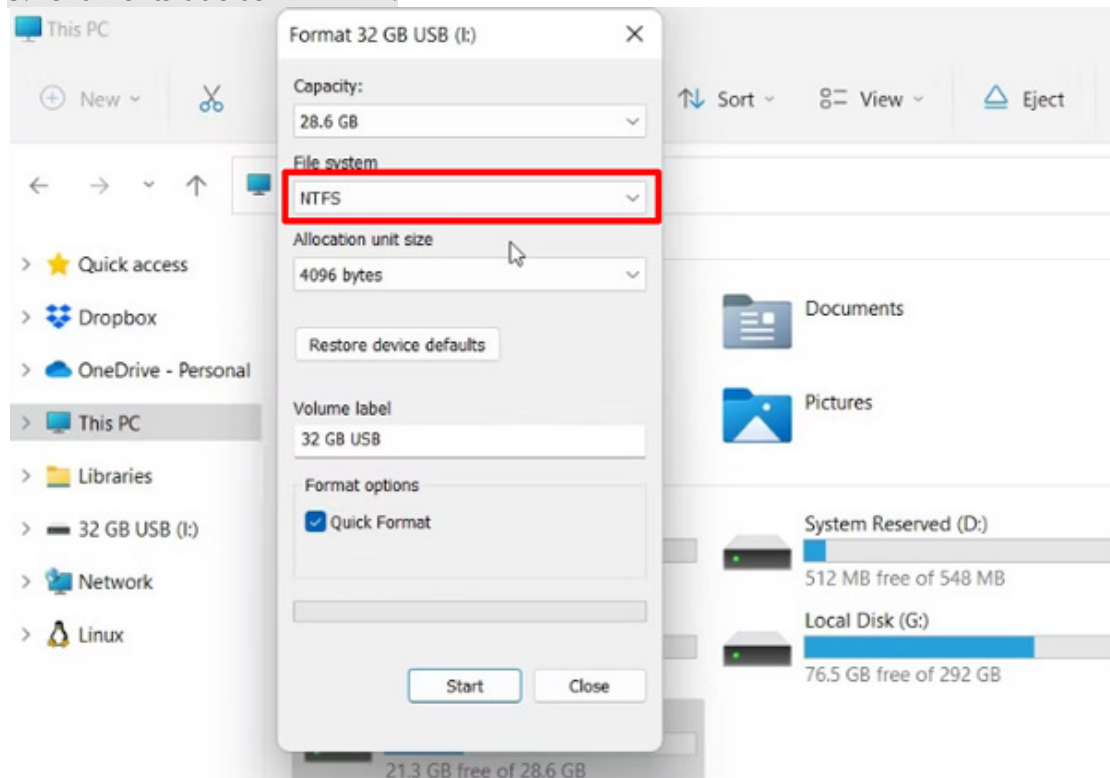

USB sticker: Capability>=16GB

OS Package

Steps

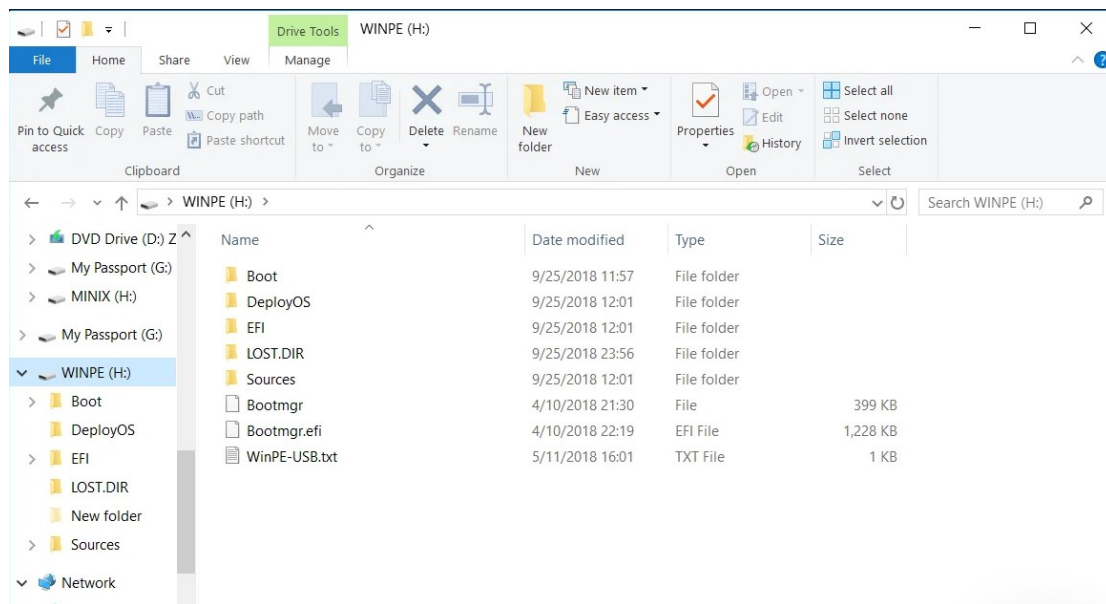

I Insert USB sticker to USB port of a PC and format it to NTFS.

- 1.Plug the USB into your Windows PC.
- 2.Press Win + E to open File Explorer.
- 3.Right-click on the USB drive and select 'Format.'
- 4.In the 'File System' dropdown, select NTFS. Then click 'Start' to begin the formatting process.
5. rename its title as **"WINPE"**.

II Download the OS package from above mentioned link and extract it with [winrar](#)/7.zip tool.

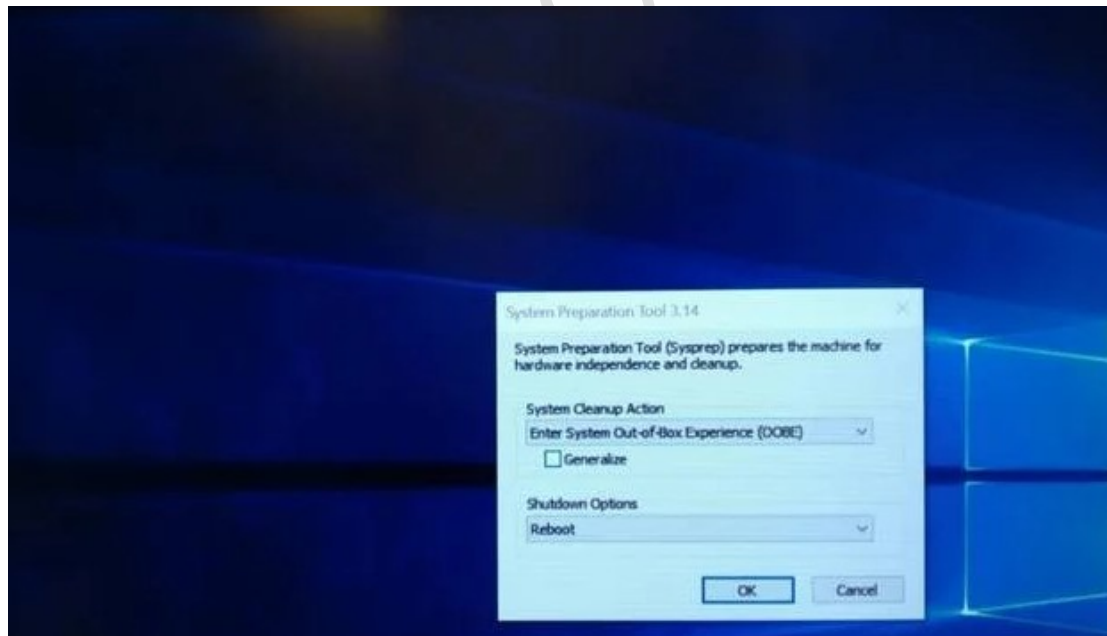

III Copy all extracted files to the USB root directory.

Connect the keyboard and USB stick to the Mini PC, power on the Mini PC, then press F11 button and select USB stick to boot in the prompt window.

You don't need to do anything, just wait for the installation finished. It'll take about 15 minutes. If you don't find the USB stick at the list in the prompted window, please check if the USB stick is NTFS. (exFAT is a known format that the device does not recognize).

When you see the same window as below picture, please click the "ok" on the desktop, then the box shall re-start.

This installation process has now been completed.
